Re: Tires for Trois Rivières / Canada consumables reminder

1) Tires for Trois Rivières – we will be using the 250-compound Goodyear radial tires for Trois-Rivières and the tires will be available at Trois Rivières. Teams should not pre-mount tires for that race here at Road America. The tire codes are: Front – 4199 / Rear - 4200

2) A reminder to make sure that you have fuel ordered – and the correct amount of fuel – for the Canadian races. Also the series is only taking a limited amount of spares and parts to the Canadian races, so teams need to order/purchase consumables from the series parts department here at Road America. These consumables include:

- Spark plugs
- Brake pads
- Brake rotors
- Mufflers
- Oil filters
- Air filters
- Wood floors
- Clutch Discs

3) You should already have filed the paperwork for your Canadian radio license and customs declarations.
