Re: 2009 Supplementary Regulations for comment / Minor waivers for 2009

2009 Supplementary Regulations:

We were pleased to get the input from those who attended the January test at Sebring.

After taking all previous comments and suggestions into consideration, this is as near as we could come to the consensus of car owners and teams wishes.

Attached in both MS Word and PDF format is a **draft** of what we think the final version should say. 2009 updates that were in revision 3 are now indicated in blue. The most recent changes are now in red.

Please consider this your last chance to comment before these Supps are published as official for 2009. If you spot any "issues", please get back to me asap... we plan to publish these next week.

2009 Minor Waivers:

During the January test at Sebring we held an owners meeting during which we discussed the minors waivers required for drivers under 18.

We have now been informed by IMSA that the minors waivers currently used by IMSA will suffice, **BUT both parents will be required to sign for the minor driver**. If for some overriding reason both parents are unable to sign, please contact IMSA driver licensing at (706) 658-2120 and determine what your options are. This must be handled well in advance of the first race in which your minor driver intends to compete... there will be no exceptions.

Update Kit Technical Brief / Version 2:

This is now updated to include two new spring rates we are adding to the rules for use ONLY with the new rockers. This will also be posted to the Competitors section of the series web site. For questions or further information, please call Tim Lewis at Race Data Engineering (714) 894-1445.
