Re: Tires for Trois Rivieres / Mosport Supplementary Regs / Canadian Radio License

- 1) Tires for Trois Rivieres – we will be using 250 compound tires at Trois Rivieres.
- 2) 250 compound tires will not be considered 'previously marked tires' for any subsequent race -- 250 compound tires will not be allowed for any official timed session. They may be used for promoter test days or private testing.
- 3) Mosport supplementary regulations – the latest packet of supplementary regulations and information from Mosport – including a full schedule of events -- is attached. This material is also posted on the series web site. You are responsible for reviewing the material.
- 4) Canadian radio license – paperwork must be filed with the Canadian authorities to obtain a license to use Star Mazda series radios in Trois Rivieres and Mosport. Click the link below to access that paperwork if you have not filed already. The form says 'Mosport' but is valid for both Canadian races.
